

About Montana KIDS COUNT

Montana KIDS COUNT is one of 53 similar projects throughout the United States funded by the Annie E. Casey Foundation. This network of state grantees utilizes data to promote the wellbeing of children at the local level, and to track changes in outcomes over time, providing the basis for comparative and trend analysis. For more information about Annie E. Casey Foundation initiatives, including the KIDS COUNT network, visit www.aecf.org.

Mission

The mission of Montana KIDS COUNT is to improve the quality of life for Montana's children and families by collecting and disseminating data that will advance awareness of the issues faced by this population. By creating awareness of existing problems, Montana KIDS COUNT provides the tools for child advocates and policymakers to promote effective decision-making that will improve the lives of children in our state.

Values

Montana KIDS COUNT believes that ...

- Properly collected and reported data are a necessity for responsible decision making;
- Policy and program decisions should be made to allow children to reach their fullest potential;
- An informed public will in turn inform decision-making processes; and
- Children deserve an even start in life.

This publication was made possible in part by the Annie E. Casey Foundation. We thank them for their support but acknowledge that the findings and conclusions presented here are those of the authors alone and may not reflect the opinions of the Foundation.

Birth, death, and WIC data used in this report were supplied by various programs in the Public Health & Safety Division of the Montana Department of Public Health & Human Services (DPHHS). DPHHS is not responsible for transcription errors, analysis, or conclusions of this report.

Introduction

It would be extremely gratifying to be able to preface this data book with pronouncements of how well Montana children are doing these days, or at least with a summary of great accomplishments achieved during the past year in the area of improving child well-being. Unfortunately, in the absence of huge and sudden changes, we have to content ourselves with an overview of the areas where we are slowly making progress.

In comparing the state data published in this book to that of our data base year of 2000, a few obvious improvements emerge. These have been extensively discussed already—traffic safety, juvenile justice, adolescent immunization coverage, and health insurance coverage. However, there are areas where the gains have not been as pronounced, yet progress is being made on a continuous basis.

“A day is committed to error and floundering; success and achievement are matters of long range”.

*Johan Wolfgang von Goethe,
German novelist*

Particularly in the realm of youth risk and protective factors do we see improvements that, from one year to the next, appear minor, but when considered over the past decade, turn out to be quite considerable. That

youth in our state smoke less than they used to is a well-known fact; however, reduction in the use of smokeless tobacco has occurred over the years as well. Similarly, youth smoking marijuana has also gone down since 2001. These changes are less dramatic than the drop in smoking, but no less worthy of notice.

However, while the juvenile offense rate has been on a significant downward trend for a long time, we experienced an unexpected up-tick in 2012. Spread across the whole state, the increase was seen primarily in the crime categories of aggravated assault and motor vehicle theft.

“Every great work, every big accomplishment, has been brought into manifestation through holding to the vision, and often just before the big achievement, comes apparent [...] discouragement”.

*Florence Scovel Shinn,
American artist*

Such a setback is not a reason for discounting the diversionary system currently in place in Montana. Instead, such a directional change in a long-range trend should encourage an examination of prevailing trends within the youth environment that may have encouraged such a change.

Furthermore, the up-tick may very well prove to be an anomaly, which makes it important to re-visit juvenile crime rates next year.

In the case of fatal alcohol-related crashes where the driver is under age 21, the trend varies widely—if a trend can actually be identified at all. However, looking at the larger picture of youth attitudes and perceptions indicates that this age group has become less tolerant of drinking and driving over the past decade. Additionally, fewer youth report engaging in this type of behavior.

“No matter how small and unimportant what we are doing may seem, if we do it well, it may soon become the step that will lead to better things”.

Channing Pollock, American writer

Clearly, current approaches are making a difference in creating a larger culture that supports healthy behavioral choices, and a clear downward trend in the number of deaths caused by intoxicated under-age drivers may be right around the corner.

Finally, as you are reading this, you may wonder what happened to the “2013” Montana KIDS COUNT data book. After some debate, we decided that it would be more meaningful to date our data book for the year of publication. The most current data years vary by indicator source, which makes it impossible to name the data book according to the date of the data within it. Consequently, as this data book is being published in 2014, we are calling it the “2014 Montana KIDS COUNT Data Book”. We’re sorry if this causes confusion, but keep in mind that “...confusion is a place where we have greater access to wisdom (Karen Wright)”. Let’s channel that wisdom into our work to better the lives of children in Montana.

Thale Dillon
Director

² Includes suicides or homicide, intentional injury or poisoning.

³ Includes causes other than trauma or poisoning.

DATA REPORTING STANDARDS

To maintain **confidentiality** for Montanans whose information is reported in this publication, event counts of less than five are suppressed.

To ensure the **precision** of the associated rates included in this publication, rates based on small numbers of events, or derived from small segments of the population, are frequently withheld. Computed rates based on 20 or more events are generally of adequate precision; thus most rates reported here are based on 20 events or more.

Breastfeeding

Of all children in birth cohort...	2010	2011	2012	2013
Ever breastfed	89%	83%	84%	82%
Breastfeeding at 6 months	55%	61%	45%	59%
Breastfeeding at 12 months	35%	28%	27%	37%
Of those who are breastfed...	2010	2011	2012	2013
Formula supplementation before 2 days of age	9%	8%	10%	14%

Source: National Immunization Survey, Centers for Disease Control & Prevention.

BREASTFEEDING

Protecting, promoting and supporting breastfeeding is an important strategy to improve the health of mothers and their children. Breastfeeding protects babies from infections and illnesses, including diarrhea, ear infections and pneumonia, and babies that are breastfed are also less likely to develop asthma, less likely to become obese, and less likely to die of Sudden Infant Death Syndrome (SIDS). Additionally, mothers who breastfeed their babies have a decreased risk of breast and ovarian cancers.

Breastfeeding initiation rates continue to rise across the country, as do rates for breastfeeding at 6 months and breastfeeding at 12 months. As another positive development, a growing number of hospitals and birth centers across the country are found to support breastfeeding. Birth facility policies and practices significantly impact whether a woman chooses to start breastfeeding and how long she continues the practice.

End Notes and Sources

DEMOGRAPHIC CHARACTERISTICS

Population numbers; Median age

Current Population Estimates, U.S. Census Bureau. Data are per calendar year.

www.census.gov/popest/data/index.html.

Household composition

American Community Survey, U.S. Census Bureau. Data are per calendar year.

<http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>.

SOCIAL & ECONOMIC CHARACTERISTICS

Overall unemployment rate

Local Area Unemployment Statistics (LAUS), Montana Department of Labor & Industry.

Data are per calendar year.

www.ourfactsyourfuture.org/?PAGEID=67&SUBID=123

Teen unemployment rate; Unemployment by race

American Community Survey, U.S. Census Bureau. Data are per calendar year.

<http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>

Notes: The unemployment rate is the percentage of the labor force that is currently unemployed. The labor force comprises all non-institutionalized individuals aged 16 or older who are either working or actively looking for work. Unemployed persons who have given up looking for a job are no longer counted as part of the labor force.

Children living with one parent; Children living with grandparents

KIDS COUNT Data Center, the Annie E. Casey Foundation. Data are per calendar year.

<http://datacenter.kidscount.org>.

Children in state care (Out-of-home placement/Adoption)

Child & Family Services, Fiscal Services Bureau (CAPS), MT Department of Public Health & Human Services. Data obtained through special request. Data are per state fiscal year.

www.dphhs.mt.gov/cfsd/index.shtml.

Notes: Out-of-Home Placement If a social worker determines that a child is in immediate danger in his/her home due to abuse and/or neglect, the child may be placed outside the home, either permanently or temporarily. District court judges must approve all out-of-home placements.

Adoption Children who have been removed from their own families due to abuse, neglect or other family problems that make it unsafe for them to remain at home, become

available for adoption if the rights of their parents have been terminated. Adoption is generally the permanency plan of choice when a court terminates parental rights, because adoption offers a child a lifetime link to a family.

Educational attainment; Poverty statistics

American Community Survey, U.S. Census Bureau. Data are per calendar year.

<http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>

KIDS COUNT Data Center, the Annie E. Casey Foundation. Data are per calendar year.

<http://datacenter.kidscount.org/>

PROGRAM STATISTICS

Temporary Assistance for Needy Families (TANF); Supplemental Nutrition Assistance Program (SNAP); Best Beginnings Child Care Scholarships

Annual Statistical Bulletin, MT Department of Public Health & Human Services. Data are per state fiscal year.

www.dphhs.mt.gov/statisticalinformation/tanfstats/tanfstatistics.shtml.

Notes: TANF is an assistance program made up of three components 1) The Job Supplement Program (JSP) provides options to a cash grant such as Medicaid coverage, child care assistance or a one-time employment-related payment; 2) The Pathways Program, a time limited monthly cash grant and opportunities leading to self-sufficiency; and 3) the Community Services Program (CSP), a cash assistance program designed for individuals who have used all of their Pathways benefits but have not achieved self-sufficiency.

SNAP is a program to supplement the food costs of low income households with food stamps that are redeemable for groceries. There are two kinds of assistance: Public-Assistance (households in which all members receive income from TANF or SSI) and Non-Assistance (all other). SNAP used to be known as the Food Stamps Program.

Best Beginnings Child Care Scholarships help pay for child care for working families whose income is at or below 150% FPL, and to families who participate in TANF. All participants pay a co-payment based on a sliding fee scale.

Free/Reduced-price lunch enrollment

Montana Office of Public Instruction. Data obtained through special request. Data are per school year.

www.opi.gov

Notes: Free/Reduced-Price Lunch is a program that provides nutritious breakfast, lunch, and after-school snacks to qualifying children in order to promote learning readiness and healthy eating habits.

WIC enrollment

Nutrition Section, MT Department of Public Health & Human Services. Data obtained through special request. Data are per federal fiscal year.

<http://wic.mt.gov/>

Notes: The Special Supplemental Nutrition Program for Women, Infants & Children (WIC) helps safeguard the health of low-income women, infants, and children up to age five who are at nutritional risk by: providing nutritious foods to supplement diets; information on healthy eating; and referrals to healthcare.

www.fns.usda.gov/wic.

HEALTH INSURANCE

Healthy Montana Kids Program, MT Department of Public Health and Human Services. Data obtained through special request. Data are per state fiscal year.

<http://hmk.mt.gov/>.

Notes: HMK is the combination of the state's two health insurance programs for low-income children, Children's Health Insurance Program (CHIP) and children's Medicaid. The numbers for each are combined into one enrollment figure for the entire program. CHIP is a federal/state partnership that expands health insurance to children whose families earn an income that is too high to qualify for Medicaid, but not high enough to purchase private insurance. In Montana, a child qualifies for CHIP if family income is too high to qualify for Medicaid, but less than 250% of FPL.

Children's Medicaid provides medical benefits to low-income people with inadequate or no medical insurance. The Federal government establishes general guidelines for the program, while program requirements are set by each state. Eligibility for children is based on the child's status, not its parents', and is set at 100% FPL.

American Community Survey, U.S. Census Bureau. Data are per calendar year.

<http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>

KIDS COUNT Data Center, the Annie E. Casey Foundation. Data are per calendar year.

<http://datacenter.kidscount.org/>

BIRTHS & DEATHS; RACIAL DISPARITY STATISTICS

Vital Statistics Analysis Unit, Public Health & Safety Division, MT Department of Public Health & Human Services. Data obtained through special request. Data are per 3-year period, with base year data covering the years 1998 through 2000, and current data covering the years 2010 through 2012.

www.dphhs.mt.gov/publichealth/epidemiology/index.shtml.

Notes: The birth and death statistics in this publication represent events recorded on

the birth and death certificates filed for Montanans and are obtained, through special request, from the Office of Epidemiology and Scientific Support (OESS) at the Montana Department of Public Health and Human Services. The statistics are a complete count of the certificates. All are based on the county of residence for the decedent (death) or mother (birth). Population-based rates for these events are calculated using the numbers of qualifying events and population estimates produced by the National Center for Health Statistics. More information about these estimates can be found at www.cdc.gov/nchs/nvss/bridged_race.htm. OESS uses the latest available revision of these estimates. To protect privacy, qualifying events of less than 5 are reported as “<5”. To maintain reliability and precision, rates and percentages are withheld where the number of qualifying events is less than 20. These cases are indicated by “^”, the carat character.

BREASTFEEDING

Breastfeeding Report Card, United States: Outcome Indicators; Centers for Disease Control & Prevention. Data are per calendar year.

www.cdc.gov/breastfeeding/data/reportcard.htm.

Office of the Surgeon General: The Surgeon General's Call to Action to Support Breastfeeding fact sheet; U.S. Department of Health & Human Services (qualitative information).

www.surgeongeneral.gov/topics/breastfeeding/factsheet.html.

United States Breastfeeding Committee (additional information).

www.usbreastfeeding.org

EARLY CHILDHOOD CHARACTERISTICS

Children without health insurance; Children in poverty

KIDS COUNT Data Center, the Annie E. Casey Foundation. Data are per calendar year.

<http://datacenter.kidscount.org/>

Licensed childcare slots

Early Childhood Services Bureau, MT Department of Public Health & Human Services. Data obtained through special request. Data are per state fiscal year.

www.dphhs.mt.gov/hcsd/childcare/

Immunization statistics

National Immunization Survey, National Center for Health Statistics, Centers for Disease Control & Prevention. Data are per calendar year.

www.cdc.gov/nchs/nis/datasets.htm

Notes: The requirements for up-to-date immunizations are based on recommendations

from the Advisory Committee on Immunization Practices (ACIP), and change every few years as new vaccinations are added to the schedule. To ensure comparability across years, rates based on the ACIP's 2000 recommendation are reported here. This 4:3:1:3 series is part of the expanded series currently recommended and includes 4 or more doses of DTaP (diphtheria, tetanus, pertussis), 3 or more doses of poliovirus vaccine, 1 or more doses of any MMR (measles, mumps, rubella), and 3 or more Hib (influenza).

Early Periodic Screening, Diagnosis & Treatment (EPSDT)

Centers for Medicare & Medicaid Services, Centers for Disease Control & Prevention. Data are per calendar year.

www.cms.gov/

HEAD START

Office of Head Start, Administration for Children & Families, U.S. Department of Health & Human Services. Data obtained from the Early Childhood Services Bureau, MT DPHHS, through special request. Data are per school year.

<http://www.acf.hhs.gov/programs/ohs/>

Notes: Head Start provides comprehensive child development services to economically disadvantaged children and families, with a special focus on helping preschoolers develop the early reading and math skills they need to be successful in school. To be eligible for Head Start services, a child must be at least three years old and its family below 100% FPL.

SCHOOLS AND EDUCATION

School enrollment statistics; Dropout rates

Montana Office of Public Instruction. Data obtained through special request. Data are per academic year.

www.opi.gov.

Notes: Public Pre-Kindergarten consists of special education preschool services under Individuals with Disabilities Education Act (IDEA) Part B, and covers children ages 3 through 5.

www.idea.ed.gov.

YOUTH RISK BEHAVIOR SURVEY

Health Enhancement & Safety Division, MT Office of Public Instruction. Data are per school year.

<http://opi.mt.gov/Reports&Data/YRBS.html>

Notes: These indicators are from the bi-annual Youth Risk Behavior Surveillance survey, conducted in odd-numbered years by OPI. They represent the experiences of youth

from 9th through 12th grade in public and private schools across the state, and assist educators and health professionals in determining the prevalence of health-risk behaviors as self-reported by Montana youth.

GENERAL AND TRAFFIC SAFETY

Juvenile offenses

Montana Incident-Based Reporting System (MTIBRS), Montana Board of Crime Control. Data are per calendar year.

<http://mbcc.mt.gov/Data/CrimeData/MOR.asp>

Notes: Data obtained from the MT Board of Crime Control reflect all offenses known to local, non-tribal law enforcement agencies, and reflect 99 percent of the Montana population. In Montana, the juvenile justice system covers youth ages 10 through 17.

Youth Court statistics

Youth Court At-A-Glance, Office of the Court Administrator, Montana Supreme Court. Data are per calendar year.

http://courts.mt.gov/dcourt/yth_court/default.mcp

Motor vehicle crash statistics

Trafficway Crash Summary, Highway Safety Division, Montana Department of Transportation. Data obtained through special request. Data are per calendar year.

www.mdt.mt.gov/publications/datastats.shtml.

Teen Drivers: Fact Sheet, Centers for Disease Control & Prevention (additional information).
